

USB CD-RW UPDATE FOR INTELLEX

This update installs the drivers necessary to use the 48X USB CD-RW drive with Intellex systems running software versions 2.5.5 and higher for 2.x platforms and 3.1.35 and higher for 3.x platforms. Installation of this update on systems running 3.x software will disable the DAT archive function.

REQUIREMENTS

- Intellex 2.x system with internal CD-ROM drive and software version 2.5.5 or higher
or
- Intellex 3.x system with internal CD-ROM drive and software version 3.1.35 or higher
- USB CD-RW part number RDVCDRX02

IMPORTANT: This update will disable the DAT tape function on an Intellex 3.x system. **DO NOT** install this update if the archive to DAT function of the Intellex is necessary. It is not possible to use a USB CD-RW and the DAT tape on an Intellex 3.x system.

INSTALLATION INSTRUCTIONS

1. Download the update from the American Dynamics web site and write it to a CD.
2. Insert the CD into the CD-ROM drive of the Intellex to be updated.
3. Exit the Intellex application by clicking on Utility, Exit.
4. Enter the eight-digit PIN to exit to the Windows Desktop.
5. Double-click on My Computer.
6. Double-click on the Compact Disc icon.
7. Double-click on the program file on the CD.
8. Respond to the installation program by clicking on the appropriate buttons.

On an Intellex 3.x system:

1. After the installation is complete, double-click on the Intellex icon to start Intellex.
2. Plug the USB CD-RW into the Intellex. There may be a message displayed that new hardware is found.
3. You may now use the CD-RW to export video clips.

On an Intellex 2.x system:

1. The Intellex will reboot after the installer completes the update.
2. Plug the USB CD-RW into the Intellex. There may be a message displayed that new hardware is found.
3. Exit the Intellex application by clicking on **Utility, Exit**.
4. Enter the eight-digit PIN to exit to the Windows Desktop.
5. Double-click on the **My Computer** icon.
6. Double-click on **Control Panel**.
7. Double-click on **System**.
8. Click on the **Device Manager** tab.
9. Expand the CD-ROM device.
10. Right-click on CR-RW device and select **Properties**.
11. Select the **Settings** tab.
12. Check the **Sync data transfer** box.
13. Uncheck the **Auto insert notification** and **Disconnect** boxes.
14. Click on **Okay** to save the settings and close the window.
15. Close the **Control Panel** and double click on the Intellex icon to start Intellex.
16. You may now use the CD-RW to export video clips.
