

# INTELLEX SOFTWARE VERSION 3.1 UPDATE

---

This software updates an Intellex unit running Intellex software version 3.1.23 to version 3.1.35 software. Intellex software version 3.1.35 includes user interface and online help translated to English, French, German, and Spanish. It also incorporates several performance improvements over version 3.1.23.

**NOTE:** This update can be installed only on Intellex units with version 3.1 software and 3.0 or 2.4 hardware platforms. Do not attempt to install this update on any other version of Intellex, or damage to your system may result. To find out what version of software you have, click **Utility**, then click **About Intellex**. The version will be displayed on the screen. If the version is 3.1.xx, the current software version is compatible with the update. To check the processor, click on **System**. If the top line indicates **Intel-833 MHz** or faster, the hardware is compatible.

## LICENSING

This software is protected with a License Key. The License Key that enabled the v3.1 software will be used by new software. Do not uninstall the previous version of software or delete any files before performing this installation.

### **CAUTION: READ BEFORE INSTALLING THE UPDATE!**

This kit is designed to update a DV8000, DV16000, Intellex RMS or Intellex Rack Mount with software version 3.1. It updates the Intellex application software and the MS Windows 2000 Professional operating system.

This software is licensed for use on a single Intellex unit. Please refer to the License Agreement at the end of this instruction as well as any third party license agreements included in this update kit.

**IMPORTANT:** Intellex software version 3.1 is optimized for the 2 GHz Pentium 4 processor used on the DV16000. Operation of some functions may be degraded if the Intellex processor is slower than 2 GHz. Do not install this upgrade on DV8000 units if such a reduction in performance is not acceptable. The Video Analysis Tools features require a Pentium 4 processor to function.
