

## TECHNICAL BULLETIN

Date: 03/19/2003  
Subject: Intellex 3.0 CD-RW Drive and DAT Drive Limitation

Technical Bulletin TB\_010703R1

**Purpose:** This bulletin identifies a limitation when using an external CD-RW drive with Intellex 3.0. This bulletin also corrects the initial technical bulletin TB\_010703 that identified this limitation as applying only to external DAT drives.

**Issue:** Intellex 3.0 systems support both the internal CD-RW and DAT drives that use the archive and Export functions. It will not support simultaneously the external USB CD-RW drive, product code RDVCDRX01, and either an internal or external DAT because Windows 2000 does not support ASPI in the same way as Windows 98. There is no ASPI driver that is compatible with both the external USB CD-RW and the SCSI DAT drive.

**Solution:** Recommend using an internal CD-RW and DAT drive simultaneously until an ASPI driver becomes available for an external CD-RW.
