Technical Bulletin TB_121102

Subject: Intellex V2.4.26 Maintenance Upgrade for the DV8000

Purpose: This bulletin identifies that there is a maintenance release of Intellex 2.4 software (2.4.26) that resolves a number of problems identified with previous releases.

Issue: Several problems have been identified with previous releases of Intellex 2.4 software. Maintenance release 2.4.26 addresses the following issues.

A database repair function is added to Storage Setup;

The text display in Playback now shows more of the last lines of text recorded;

The text search functionality is more effective;

A problem with changing to Daylight Saving Time in southern hemisphere countries is corrected.

The duplicate startup shortcut in DV8000 systems is fixed;

The file access error in *Archive to DAT* is fixed;

The *Intellex Export Player* is fixed.

Note: This update should only be installed on Intellex units with software version 2.4.21 or version 2.4.25. Attempting to install this update on any other version of Intellex, may result in damage to your system.

To find out what version of software you have, click on *Utility*, then *About Intellex*. The version will be displayed on the screen. If the version is 2.4.21 or version 2.4.25, you may install this update.

Solution: Follow the instructions below to complete the download and upgrade.

Download Instructions

1. On a PC equipped with a CD writer, download and save the software below to your local hard drive.
2. Copy the file to a CD for installation onto the Intellex.
3. Proceed with the installation as outlined in the [Intellex v2.4.26 Software Update Instructions](#).
